## DETAILED ACTION

### *Acknowledgment*

1. The amendment filed on 5/18/2005 has been entered.

### *Abstract*

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

Art Unit: 3618

3. The abstract of the disclosure is objected to because the abstract can not have a term "for example" and the abstract should be included a technical improvement. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3, 6, 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, the phrase "a single drive shaft couple to a single output shaft of the transmission; and coupled to the single drive shaft" is unclear, how the single drive shaft coupled to the single drive shaft.

Regarding claims 3 and 6, the phrase "means for propelling the vehicle" is not sure, whether "means" is a wheel or another device used to propelling the vehicle (notice the wheel can not be itself to propel the vehicle, because the wheel does not generate any power).

Regarding claim 3, the phrase "wherein the means for propelling the vehicle comprises a propeller coupled to the single drive shaft" is not sure, which one is a propeller in the drawing or in the specification and what kind of power that propeller have to propelling the vehicle.

Regarding claim 9, the phrase "coupling a single transmission output to a propeller" is unclear, which one is a propeller (Notice the differential and the

Art Unit: 3618

wheels can't be a propeller, because the differential and the wheels did not have any power to propeller the vehicle).

***Allowable Subject Matter***

6. Claims 1-2, 5, 7-8 and 10-11 are allowed.

7. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the non-transverse propulsion drive arrangement for a vehicle as recited in claims 1 and 7, which include a transfer case having only a single output shaft. The non-transverse propulsion drive arrangement for a vehicle also includes an engine, which is located a position that is laterally offset from and adjacent to a side of a transmission so as to be essentially parallel with the transmission along respective longitudinal axes thereof. Wherein an input shaft and the output shaft of the transfer case are both located on a same side of the transfer case corresponding to the one end of the engine and wherein both the engine and the transmission are arranged behind the axle and a differential in a rear-mounted engine configuration. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3618

8. Claims 3, 6 and 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
